

Dr. Christine Miller
Assistant Professor
Department of Entomology
& Nematology
College of Agricultural & Life
Sciences

Christine W. Miller is an evolutionary biologist who focuses on the evolutionary interplay between behavior and morphology. Dr. Miller graduated in 1998 from Wesleyan University in Middletown, CT. One of the more influential experiences for Dr. Miller during her college years was a 4 month study-abroad trip to Tanzania, in East Africa. After college, Dr. Miller took three years to work a variety of biology jobs and to travel the world. She drew on these experiences when she started a Ph.D. program in Organismal Biology and Ecology at the University of Montana. Her Ph.D. research took her to the Smithsonian Tropical Research Institute in Panama. Dr. Miller started at UF in 2007 as an Assistant Research Scientist and was promoted to Assistant Professor in 2011.

Global Research Interests

- Animal behavior
- Evolutionary ecology
- Tropical rainforest ecology

Countries of Focus

- Australia
- Panama
- Singapore
- Japan
- Ecuador
- Brazil

Mentor: Emilio Bruna

- Professor
- Department of Wildlife Ecology and Conservation, College of Agricultural and Life Sciences
- Center for Latin American Studies
- Email: embruna@ufl.edu
